PERSONAL INTRODUCTION, CAREER OBJECTIVES

As a full-stack developer with around 2 years of experience, I bring a strong foundation in web development and a continuous drive to learn and grow. Technically, I contribute by writing clean, maintainable code and approaching problems with a proactive mindset. Personally, I am reliable, honest, and take full responsibility for my work.

In the short term, I'm focused on sharpening my skills in web application development. Over the next 1 to 1.5 years, I plan to expand into DevOps to gain a deeper understanding of deployment pipelines and infrastructure.

EDUCATION

Sai Gon University

2019 – 2024

- **Degree:** Engineering Degree
- **Major:** Software Engineering

TECHNICAL SKILLS

Programming Languages: TypeScript, C#, Python(basic), Go(basic)

Front-end Framework: Angular, ReactJS, NextJS, VueJS, TailwindCSS, Bootstrap

Back-end Framework: ExpressJS, NestJS, .NET

CMS: Hubspot, WordPress(basic)

Database: PostgreSQL, SQL Server, Redis, MongoDB(basic)

Cloud: Azure

Other: Git, Docker, Coolify

EXPERIENCE

Fullstack Developer, Fresher

10/2024 – present

Consortia Group (consortiagroup.co), Ho Chi Minh City

- Gained practical experience in web development, led a team, participated in interviews, and guided intern.
- Contributed to the **Service Hub** project for **Midwest Loan Services** (link).
 - **Technologies:** NextJs, NestJS, Tailwind CSS, SQL Server, Sequelize, Docker, Azure Services.
 - **Team size:** 5 (1 Senior, 3 Juniors, 1 Fresher)
 - **Role:** Fullstack Developer
 - **Project description:** Building a new website and a set of new integration services for an existing microservices system, designed to handle real-time ELOC (Equity Line of Credit) withdrawal requests efficiently and reliably.
 - **Responsibilities:**
 - * Collaborated with the BA to define and maintain technical design document and database schema.
 - * Developed APIs for new service in the existing microservices.
 - * Integrated the application with Azure services, including Container Registry and App Service.
 - * Maintained Dockerfile and docker-compose configurations; responsible for deploying the application to the staging environment.
 - * Prepared and maintained deployment documentation, deployment scripts, and release packages for client delivery.

- Contributed to the **Client Portal** project for **Midwest Loan Services** (link).
 - **Technologies:** NextJS, ExpressJS, Tailwind CSS, SQL Server, Sequelize, Docker, Azure Services.
 - **Team size:** 5 (1 Senior, 3 Juniors, 1 Fresher)
 - **Role:** Fullstack Developer
 - **Project description:** Developed a web portal for borrowers and investors to manage their loans, receive notifications from internal staff, and exchange files and documents.
 - **Responsibilities:**
 - * Implemented RBAC (Role-Based Access Control).
 - * Developed approximately 30% of the project's APIs.
 - * Built the UI based on Figma designs and integrated it with the backend.
 - * Integrated the application with Azure services, including Storage Blob, Application Insights, Container Registry and App Service.
 - * Maintained Dockerfile and docker-compose configurations; responsible for deploying the application to the staging environment.
 - * Prepared and maintained deployment documentation, deployment scripts, and release packages for client delivery.
- Contributed to the **Arch App** project for **The Outsourcing Agency** (link)
 - **Technologies:** Vue.js 2, Bootstrap, NestJS, Sequelize, PostgreSQL, Docker, Mailgun
 - **Team size:** 4 (1 Senior, 2 Freshers, 1 Intern)
 - **Role:** Fullstack Developer
 - **Project description:** An ERP and administration web platform for an architecture company, supporting internal operations management across multiple business areas.
 - **Responsibilities:**
 - * Migrated backend code from two separate projects (Golang and PHP) into a unified NestJS-based project.
 - * Enhanced frontend code for responsiveness and implemented new pages based on updated designs.
 - * Maintained Dockerfile and docker-compose configurations; responsible for deploying the application to the staging environment.

Fullstack Developer, Fresher

08/2023 – 02/2024

ITC Group (itcgroup.io), Ho Chi Minh City

- Learn practical knowledge in web development, including Angular, NestJS, PostgreSQL and Hubspot CMS.
- Contributed to project **Website** for **Joblogic** (link)
 - **Technologies:** HubSpot, HubSpot API, Bootstrap, jQuery
 - **Team size:** 3 (1 Senior, 2 Freshers)
 - **Role:** Frontend Developer
 - **Project Description:** Migrated the existing WordPress-based website to the HubSpot platform.
 - **Responsibilities:**
 - * Participated in migrating the theme from WordPress to HubSpot.
 - * Enhanced the UI based on new designs.
 - * Created and maintained Python scripts using the HubSpot API to synchronize page data between staging and production environments.
 - * Acquired foundational knowledge in SEO.
- Contributed to the project **Updiagram** for **ITC Group** (link)
 - **Technologies:** Angular, NestJS, Bootstrap, PostgreSQL
 - **Role:** Fullstack Developer
 - **Project Description:** An internal project used for task management.
 - **Responsibilities:**
 - * Maintained APIs and improved the user interface with new features.

C# Developer, Intern

05/2020 – 04/2021

Integration Software (phanmemhoinhap.com), Ho Chi Minh City

- Gained foundational knowledge in using C#, .NET, and WinForms to implement new features and maintain existing projects.

PERSONAL PROJECTS

Grassway

05/2024 – 07/2024

A free brand bio and URL shortener web app inspired by bit.ly and linktree.

- Tech Stack: Angular, NestJS, PostgreSQL, Redis, Docker
- Features: URL shortening, brand page creation, URL analysis, real-time brand editing, notifications and more.
- Github: <https://github.com/hainnotlazy/grassway>
- Live Demo: grassway.xyz

CERTIFICATIONS

2024: TOEIC LR 795**2020:** Python Web Programming Course (issued by the Computer Center of VNUHCM)
